Contents [ShowHide]Do you have a dream of building your own city? You want to be the boss of a city? Hello! Welcome to Idle Frontier: Tap Town Tycoon (MOD Free Upgrade) – the opportunity is to come to you, especially if you are not afraid to click a little more. This game was released by Kongregate, who developed Animation Throwdown. In the game, you are responsible for developing a beautiful small town near a river. Turn your city into a rich city with a large number of people and many shopping malls. Start building the cityAt the beginning of the game, your city consists of just a shop, a factory, a horse cart and a freight boat. At this point, you need to work hard and invest properly if you want to grow your city. Clicking on your buildings helps it run, produce supplies and make a profit. The production process of the game is quite easy to understand. First of all, you produce goods at the factory. The goods are then delivered to the post office with a shipment. Transportation continues to transport your cargo from mail to boat. The boat will take the goods to other areas, and then some money will be transferred to your account. You can't skip any steps. If you omit a position, the goods will fall in excess. Grow Your Frontier Town: Tap Town Tycoon is an inactive game with very simple gameplay. Anyone can play because all you have to do when playing this game is click, click and click. Right! Use a finger to click on homes in the city, help these homes to work and produce different types of goods. You can take a walk up to the city center and take a look: Apart from the wagons, the river flows smoothly and some dirt roads, this non-interactive game is still quite boring. Fortunately, you seemed to turn this place into a flourishing, lively place! Click to build a grocery store, hire staff, commercial goods and collect resources to expand your old-fashioned business empire. You can also upgrade and automate your business so that everything goes well when you're away. Your cityYou can upgrade buildings in the city to increase the number of goods produced. Modernizing the post office helps you transport more goods, upgrading the boat will increase the number of goods you can sell, thus earning more In my opinion, you should upgrade every building. Because if you focus on upgrading the dock, your assets aren't enough to supply every boat. Or if you upgrade too much in the factory, you'll have many redundancy supplies that can't be sold. Hiring managersFrom Idle Frontier: Tap Town Tycoon is an inactive game, you can hire the manager of each building instead of clicking all by yourself. This helps you reduce the frequency of clicking on the screen. Your employees continue to work, even after you close the game. When you return to the game, you will receive the amount that your staff has worked on. Hiring managers do your automatic work. In my opinion, you should hire a manager at the dock and the factory. These are two irreplaceable positions for you to take advantage of. Hiring managers help you avoid delays in delivering goods. DesignIdle Frontier: Tap Town Tycoon brings you peace and happiness thanks to colorful 2D graphics. Although not comparable to high-quality graphics games today, but with harmonious, bright images, you will feel satisfied and enjoyable every time you play this game. The people of the city are described by the cute chibi image. MOD APK version of Idle Frontier: Tap Town TycoonMOD featuresFree upgrade. Anti Ban.Increase profit. Download Idle Frontier: Tap Town Tycoon MOD APKBecause this is the wild west. Like the friendly inhabitants of the city, Idle Frontier: Tap Town Tycoon brings an extremely comfortable, pleasant and extremely attractive atmosphere. But be careful, because some scammers are waiting for the opportunity to ruin your entire operation. Because this is the wild west. It's a good game to kill time and even earn currency while giving away while offering the choice of ads to keep up with the required currency. What is contradictory is an issue where you move out of your city every time you reach a new level/unlock a new store. When this happens, it essentially starts all over again, but in a different season and im not sure why they included this aspect rather than just continuously progressing your city. It is not hard to build back, but rather, repetitively annoying. If the seasons need to be added, why not keep jumping between the same 4 cities?? Regardless, the biggest bone I have to choose (and many will agree according to the comments), is the events. Im new to this game (level 6 only), but I got the jist of it pretty quickly. Events work differently and so they say... And that's it. There is no tutorial on how it works, so you just do what you would normally do (which doesn't progress you) and have all these extra confusing things because there is no tutorial or help menu to explain it. So moment, im not seeing the point of events either because you can progress if you don't know what you're doing? Or why would you want to do them when you don't know these unique rewards? So while this game is fun for now, it is not one that you provide the game for an extended duration, unless some changes are made. Made. Made.
